

## Bayside Sensitivity Training Participants

Company/Contractor employee(s) that participated in the Cultural Resource Recognition Training presented by Public Archeology Laboratory (PAL) are included in the list below. PAL's training was specifically for those Contractors who anticipate performing sewer connection services for homes located in the Bayside area when the sewer project is completed.

Please note that this list is for informational purposes only and includes those companies whose employee(s) participated in the training. The list is not a recommendation/endorsement of the company by the Warwick Sewer Authority (WSA). When you choose a contractor, it is recommended that the employee who attended the training perform the work. If your contractor is not listed and would like to participate in the training, please have them contact the Warwick Sewer Authority at 401-468-4700. The Warwick Sewer Authority strongly recommends that contractors hired to perform service connection(s) in the Bayside Project area obtain the training. The WSA strongly advises that all residents obtain more than one (1) quotation in order to receive the most reasonable sewer connection fee.

Company	Contact Information
A & C Site and Septic Contractors, LLC	639-3967
Steven Allen Contracting, LLC	885-0059

The connection must be performed by a State of Rhode Island licensed underground utility contractor or master plumber. For the most up to date information on the status of a licensed contractor, visit the Contractors' Registration and Licensing Board website at <https://crb.ri.gov/consumer/search-registrantlicensee>. For a list of contractors, click on "check a registrant/licensee," under contractor type, click the arrow and select "underground utility" from the drop down, then click on "submit query."
